Further, these plans are not static, but are subject to continuous internal review and may be altered if the altered plans are perceived to suit the Company’s needs better. Further, many of the plans may be based on one or more underlying assumptions (all of which may not be contained in this Document) which may not come to fruition. Thus, actual results may differ materially from those suggested by the forward-looking statements. The Company cannot be held liable by estoppels or otherwise for any forward-looking statements contained herein. The Company and all intermediaries associated with this Document do not undertake to inform Investors of any changes in any matter in respect of which a forward-looking statement are made.

All statements contained in this Document that are not statements of historical fact constitute “forward-looking statements” and are not forecasts or projections relating to the Company’s financial performance. All forward-looking statements are subject to risks, uncertainties and assumptions that may cause actual results to differ materially from those contemplated by the relevant forward-looking statement. Important factors that may cause actual results to differ materially from the Company’s expectations include, among others:

- General economic and business conditions in India and abroad.
- Our ability to successfully implement our strategy, our growth and expansion plans and technological changes.
- Our ability to compete effectively and access funds at competitive cost.
- Changes in the value of Rupee and other currency changes.
- Unanticipated turbulence in interest rates, equity prices or other rates or prices; the performance of the financial and capital markets in India and globally.
- Availability of funds and willingness of our lenders to lend.
- Changes in political conditions in India.
- The rate of growth of our loan assets and level of NPAs in our portfolio.
- Potential mergers, acquisitions or restructuring and increased competition.
- The outcome of any legal or regulatory proceedings in which we are or may become a party to.
- Our ability to recruit and retain our management team and skilled personnel.
- Changes in Indian and foreign laws and regulations, including tax, accounting, banking, securities, investments and loans, foreign exchange, insurance, and other regulations; changes in competition and the pricing environment in India; and regional or general changes in asset valuations; and

As a result, actual future gains or losses could materially differ from those that have been estimated. Neither our Company, our Directors and Officers nor any of their respective affiliates have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition. For further discussion of factors that could cause our actual results to differ, see the section titled “Risk Factors”.

## **(B) Use of Market Data**

Unless stated otherwise, macroeconomic and industry data used throughout this Document has been obtained from publications prepared by providers of industry information, government sources and multilateral institutions. Such publications generally state that the information contained therein has been obtained from sources believed to be reliable but that their accuracy and completeness are not guaranteed and their reliability cannot be assured.

Although the Issuer believes that industry data used in this Disclosure Document is reliable, it has not been independently verified.

## **(C) RISK FACTORS**

The following are the risks envisaged by the management and Investors should consider the following risk factors carefully for evaluating the Company and its business before making any investment decision. Unless the context requires otherwise, the risk factors described below apply to Aditya Birla Finance Limited only. The risks have been quantified wherever possible. If any one of the following stated risks actually occurs, the Company's business, financial conditions and results of operations could suffer and therefore, the value of the Company's debt securities could decline.

Note: Unless specified or quantified in the relevant risk factors, the Company is not in a position to quantify the financial or other implications of any risk mentioned herein below:

### **A. INTERNAL RISK FACTORS**

- 1. As an NBFC, one of the most important risks affecting the profitability of the Company is the risk of non-payment by the borrowers and other counterparties.**

**Our Company's gross loan including investments as on March 31, 2023 is Rs. 80,556 crores.** The size of our Company's loan assets is expected to continue to increase in the future as our Company expands its business in India and offers new products. Since most of our Company's borrowers are individuals and small and medium size companies, our Company's credit risk could be higher due to their potential inability to adapt to changes in the economic and industrial scenario and global technological changes as also changes in the Indian regulatory and political environment. This may lead to an increase in the number and value of our Company's NPAs.

Our Company is exposed to the risk that third parties which owe us money, securities or other assets may not perform their obligations. These parties may default on their obligations to us due to various reasons including bankruptcy, lack of liquidity, operational failure, and other reasons. Further, any delay in enforcing the collateral due to delays in enforcement proceedings before Indian courts or otherwise could expose our Company to potential losses.

In deciding whether to extend credit to or enter transactions with customers and counter parties, our Company relies largely on information furnished by or on behalf of its customers, including financial information, based on which the Company performs its credit assessment. The Company may also depend on certain representations and undertakings as to the accuracy, correctness and completeness of information, and the verification of the same by agencies to which such functions are outsourced. Any such information, if materially misleading, may increase the risk of default. Our financial condition and results of operations could be negatively affected by relying on information that may not be true or may be materially misleading.

The Company has institutionalized a systematic credit evaluation process monitoring the performance of its asset portfolio on a regular and continual basis to detect any material development, and constantly evaluates the changes and developments in sectors to which it has substantial exposure. The Company also undertakes a periodic review of its entire asset portfolio with a view to determine the portfolio valuation, identify potential areas of action and devise appropriate strategies thereon. The Company follows a provisioning and write-off policy which is in line with what is prescribed by the RBI.

Although our Company regularly reviews credit exposures to clients and counterparties, and to industries and geographical regions that our Company believes may present credit concerns, defaults may arise from events or circumstances that are difficult to detect or foresee.

## 2. **Interest Rate Risk**

The Company's business is largely dependent on interest income from its operations.

The Company is exposed to interest rate risk principally as a result of lending to customers at interest rates and in amounts and for periods, which may differ from its funding sources (institutional / bank borrowings and debt offerings). The Company seeks to match its interest rate positions to minimize interest rate risk. Despite these efforts, there can be no assurance that significant interest rate movements will not have an effect on its results of operations. Interest rates are highly sensitive to many factors beyond its control, including the monetary policies of the RBI, deregulation of the financial sector in India, domestic and international economic and political conditions, inflation, and other factors. Due to these factors interest rates in India have historically experienced a relatively high degree of volatility. Nevertheless, the endeavor of the Company will be to keep the interest rate risk at minimum levels by proactively synchronizing resource securing and lending activities on an ongoing basis.

## 3. **Access to Capital Markets and Commercial Borrowings**

The Company's growth will depend on its continued ability to access funds at competitive rates. With the growth of its business, the Company is increasingly reliant on funding from the debt capital markets and commercial borrowings. The market for such funds is competitive and its ability to obtain funds at competitive rates will depend on various factors, including its ability to maintain its credit ratings. While its borrowing costs have been competitive in the past due to its credit rating and the quality of its asset portfolio, if the Company is unable to access funds at an effective cost that is comparable to or lower than its competitors, the Company may not be able to offer competitive interest rates for its loans. This may adversely impact its business and its future financial performance. The value of its collateral may decrease, or the Company may experience delays in enforcing its collateral when its customers default on their obligations, which may result in failure to recover the expected value of collateral and adversely affect its financial performance.

The developments in the international markets affect the Indian economy including the financial liquidity position. Our Company is exposed to the risk of liquidity in the financial markets. Changes in economic and financial conditions could make it difficult for the Company to access funds at competitive rates. Being an NBFC, we also face certain restrictions to raise money from international markets which are relatively cheaper sources of money and this further constrains our ability to raise cheaper funds.

## 4. **Failure to recover the expected value of collateral when borrowers default on their obligations to Company may adversely affect its financial performance.**

ABFL cannot guarantee that it will be able to realize the full value of its collateral, due to, among other things, defects in the perfection of collateral, delays on its part in taking immediate action in bankruptcy foreclosure proceedings, stock market downturns, claims of other lenders, legal or judicial restraint and fraudulent transfers by borrowers. In the event a specialized regulatory agency gains jurisdiction over the borrower, creditor actions can be further delayed. In addition, to put in place an institutional mechanism for the timely and transparent restructuring of corporate debt, the RBI has devised a corporate debt restructuring system. Any failure to recover the expected value of collateral security could expose ABFL to a potential loss. Apart from the RBI guidelines, ABFL may be a part of a syndicate of lenders, the majority of whom elect to pursue a different course of action than the Company would have chosen. Any such unexpected loss could adversely affect business, prospects, results of operations and financial condition.

## 5. **Asset-Liability mismatches in the short term, which could affect company's liquidity position.**

The difference between the value of assets and liabilities maturing in any time period category provides the measure to which we are exposed to the liquidity risk. As is typical for several NBFCs, a portion of our funding requirements is met through short-term funding sources, i.e. working capital demand loans, cash credit, short term loans and commercial papers. However, some portion of our assets has medium or long-term maturities. As the Company grows its business, the proportion of medium and long-term assets in the portfolio is expected to grow. In the event that the existing and committed credit facilities are withdrawn or are not available to the Company, funding mismatches may be created, and it could have an adverse effect on our business and our future financial performance.

6. **Our inability to control the number and value of NPAs in our portfolio could adversely affect our business and results of operations.**

The Company's inability to control or reduce the number and value of its NPAs may lead to deterioration of the quality of its loan portfolio and may severely impact its business.

While the Company's total provisioning against the NPAs at present may be adequate to cover all the identified losses in our loan portfolio, there may not be any assurance that in future the provisioning, though compliant with regulatory requirements, will be sufficient to cover all anticipated losses.

Further, the Company may not be able to meet its recovery targets set for the particular financial year due to the intense competition witnessed at both global and domestic levels. In such circumstances, there could be an increase in the number and value of NPAs which can impact the Company.

7. **System failures, infrastructure bottlenecks and security breaches in computer systems may adversely affect our business.**

Our businesses are highly dependent on our ability to process, on a daily basis, a large number of increasingly complex transactions. Our financial, accounting, or other data processing systems may fail to operate adequately or become disabled as a result of events that are wholly or partially beyond our control, including a disruption of electrical or communications services. If any of these systems do not operate properly or are disabled or if there are other shortcomings or failures in our internal processes or systems, it could affect our operations or result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation. In addition, our ability to conduct business may be adversely impacted by a disruption in the infrastructure that supports our businesses and the localities in which we are located.

Our operations also rely on the secure processing, storage, and transmission of confidential and other information in our computer systems and networks. Our computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code and other events that could compromise data integrity and security.

8. **Our indebtedness and restrictive covenants imposed by our financing agreements could restrict our ability to conduct our business and operations.**

Our financing agreements require us to maintain certain security margins. Should we breach any financial or other covenants contained in any of our financing agreements, we may be required to immediately repay our borrowings either in whole or in part, together with any related costs. Under the terms of some of the credit lines, the Company is required to obtain the prior written consent of the concerned lender prior to the Company entering into any scheme of expansion, merger, amalgamation, compromise or reconstruction or selling, leasing, transferring all or a substantial portion of its fixed and other assets; making any change in ownership or control or constitution of our Company, or in the shareholding or management or majority of directors, or in the nature of business of our Company; or making amendments in the Company's Memorandum and Articles of Association. This may restrict/ delay some of the actions / initiatives that our Company may like to take from time to time.

9. **We may not get the benefits of being Aditya Birla Group Company in case of any change of control.**

In case of any change of control due to any event such as transfer of shares by our Promoter, preferential allotment to any investor, our ability to leverage the "Aditya Birla" brand may get affected and the benefits of being an Aditya Birla Group company including leveraging of business from other Aditya Birla Group companies may not be available to us and consequently, could adversely impact our business operations and profitability.

10. **We are exposed to various operational risks including the risk of fraud and other misconduct by employees or outsiders.**

Like other financial intermediaries, we are also exposed to various operational risks which include the risk of fraud or misconduct by our employees or even an outsider, unauthorized transactions by employees or third parties, misreporting and non-compliance of various statutory and legal requirements and operational errors.

It may not be always possible to deter employees from the misconduct or the precautions we take to detect and prevent these activities may not be effective in all cases. Any such instances of employee misconduct or fraud, the improper use or disclosure of confidential information, could result in regulatory and legal proceedings and may harm our reputation and also our operations.

**11. We may not be able to attract or retain talented professionals required for our business.**

The complexity of our business operations requires highly skilled and experienced manpower. Such highly skilled personnel give us a competitive edge. Further the successful implementation of our growth plans would largely depend on the availability of such skilled manpower and our ability to attract such qualified manpower. We may lose many business opportunities and our business would suffer if such required manpower is not available on time. Though we have appropriate human resource policies in place, we may face the risk of losing our key management personnel due to reasons beyond our control and we may not be able to replace them in a satisfactory and timely manner which may adversely affect our business and our future financial performance.

**12. The Company faces increasing competition from established banks and NBFCs. The successful implementation of our growth plans depends on our ability to face the competition.**

The Company's main competitors are established commercial banks and NBFCs. Over the past few years, the financing area has seen the entry of banks, both nationalized as well as foreign. Banks have access to low cost funds which enables them to enjoy higher margins and / or offer finance at lower rates. NBFCs do not have access to large quantities of low-cost deposits, a factor which can render them less competitive. The Company also faces increased competition from new NBFC's foraying into this space and some of which have been quite aggressive in their pricing to garner market share.

**13. We may have a high concentration of loans to certain customers or group of customers. If a substantial portion of these loans becomes non-performing, our business and financial performance could be affected.**

Our business of lending with or without securities exposes us to the risk of third parties that owe us money. Our loan portfolio and non-performing asset portfolio has, or may in the future, have a high concentration in certain customers or groups of customers. These parties may default on their obligations to us due to bankruptcy, lack of liquidity, operational failure, and breach of contract, government or other regulatory intervention and other reasons including inability to adapt to changes in the macro business environment. Historically, borrowers or borrower groups have been adversely affected by economic conditions in varying degrees. Credit losses due to financial difficulties of these borrowers / borrower groups in the future could adversely affect our business and our financial performance.

**Risks Relating to the Utilization of Issue Proceeds**

**14. Our management will have significant flexibility in applying proceeds of the Issue.**

The funds raised through this Issue, after meeting the expenditures of and related to the Issue, will be used for our various activities, including but not restricted to, lending and investments, to repay our existing loans, our business operations including capital expenditure and working capital requirements.

The Main Objects clause of the Memorandum of Association of the Company permits the Company to undertake the activities for which the funds are being raised through the present Issue and also the activities which the Company has been carrying on till date.

The management of the Company, in accordance with the policies formulated by it from time to time, will have flexibility in deploying the proceeds received from the issue.

Pending utilization of the proceeds out of the Issue for the purposes described above, the Company intends to temporarily invest funds in high-quality interest-bearing liquid instruments including money market mutual funds, deposits with banks or temporarily deploy the funds in investment grade interest bearing securities as may be approved by the Board.

Further as per the provisions of the SEBI (Issue and Listing of Non-Convertible Securities) Regulations, 2021, we are not required to appoint a monitoring agency and therefore no monitoring agency has been appointed for this Issue.

## Risks Relating to the Debentures

### 15. Changes in general interest rates in the economy may affect the price of our Debentures.

All securities where a fixed rate of interest is offered, such as our Debentures, are subject to price risk. The price of such securities will vary inversely with changes in prevailing interest rates, i.e. when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of prevailing interest rates. Increased rates of interest, which frequently accompany inflation and /or a growing economy, are likely to have a negative effect on the price of our Debentures.

### 16. We are not required to maintain any Debenture Redemption Reserve (DRR) for the Debentures issued under this Disclosure Document.

No Debenture Redemption Reserve is being created for the issue of NCDs in pursuance of this Document since creation of Debenture Redemption Reserve is not required for the proposed issue of Debentures. In accordance with Rule the (18) (7)(b)(iv)(A) of Companies (Share Capital and Debentures) Rules 2014 the Company is not required to create DRR for privately placed debentures.

### 17. Any downgrading in credit rating of our Debentures may affect the value of Debentures and thus our ability to raise further debts.

The Company has obtained credit rating from the following agencies, of which the proposed issue forms a part:

**India Ratings & Research has assigned a rating of "IND AAA Stable" (for an amount of Rs. 15,906.60 crore) and ICRA Limited has assigned a rating (for the amount of Rs. 28,686.40 crore) of "[ICRA] AAA (Stable)".**

The Issuer cannot guarantee that the rating will not be downgraded. Such a downgrade in the above credit ratings may lower the value of the NCDs and may also affect the Issuer's ability to raise further debt.

## B. EXTERNAL RISK FACTORS

### 18. We are subject to regulatory and legal risk which may adversely affect our business.

The operations of an NBFC are subject to directions/ regulations framed by the RBI and other authorities including regulations relating to foreign investment in India.

We are also subject to changes in Indian laws, regulations, and accounting principles.

There can be no assurance that the laws governing the Indian financial services sector will not change in the future or that such changes or the interpretation or enforcement of existing and future laws and rules by governmental and regulatory authorities will not affect our business and future financial performance.

### 19. Our growth depends on the sustained growth of the Indian economy. An economic slowdown in India and abroad could have direct impact on our operations and profitability.

Macroeconomic factors that affect the Indian economy and the global economic scenario have an impact on our business. The Indian economy has grown about, 6.1% in FY19, 4% in FY20, (-)6.6% in FY 21 and 8.9% in FY 22. Recent trends suggest that the economy may grow at a flat pace which may have a direct impact on our disbursements and a slowdown in the economy as a whole can increase the level of defaults thereby adversely impacting the Company's growth plans and the quality of its portfolio.

A sustained slowdown in the Indian economy could adversely affect its business, including its ability to grow its asset portfolio, the quality of its assets, and its ability to implement its strategy. India's economy could be adversely affected by a general rise in interest rates, or various other factors affecting the growth of industrial, manufacturing and services sector or general down trend in the economy.

**20. Civil unrest, terrorist attacks and war could affect our business.**

Terrorist attacks and other acts of violence, war, or conflicts, particularly those involving India, as well as the United States of America, the United Kingdom, Singapore, and the European Union, may adversely affect Indian and global financial markets. Such acts may negatively impact business sentiment, which could adversely affect our business and profitability. India has from time to time experienced, and continues to experience, social and civil unrest, terrorist attacks and hostilities with neighboring countries. Also, some of India's neighboring countries have experienced, or are currently experiencing internal unrest. This, in turn, could have a material adverse effect on the market for securities including the Debentures. The consequences of any armed conflicts are unpredictable, and we may not be able to foresee events that could have an adverse effect on our business and the price and yield of our NCDs.

**21. Our business may be adversely impacted by natural calamities or unfavorable climatic changes.**

India, Nepal, Bangladesh, Pakistan, Indonesia, and other Asian countries have experienced natural calamities such as earthquakes, floods, droughts, and a tsunami in recent years. Some of these countries have also experienced pandemics, including the outbreak of avian flu / swine flu. The extent and severity of these natural disasters and pandemics determines their impact on these economies and in turn affects the financial services sector of which our Company is a part. Prolonged spells of abnormal rainfall and other natural calamities could have an adverse impact on the economies in which we have operations, which could adversely affect our business and the price of our Debentures.

**22. Any downgrading of India's sovereign rating by an international rating agency (ies) may affect our business and our liquidity to a great extent.**

Any adverse revision to India's credit rating for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our financial performance and our ability to obtain financing to fund our growth on favorable terms, or at all.

**NOTES TO THE RISK FACTORS**

Save, as stated elsewhere in this Disclosure Document, since the date of the audited financial accounts, no developments have taken place that are likely to materially and adversely affect the performance or prospects of the Company.

**Industry Overview**

Non-Banking Financial Companies (NBFCs) act as a critical link in the overall financial system catering to a large market of niche customers. They are one of the major purveyors of credit in India. NBFCs have displayed flexibility in meeting credit needs of specific sectors like leasing, hire purchase, hire purchase finance, consumer finance etc.

NBFCs in India offer a wide variety of financial services and play an important role in providing credit to the unorganized sector and small borrowers at the local level. As a result of consolidation and restructuring in the financial sector and liberalisation and globalisation of markets only a few strong NBFCs now remain in business. However, competition has become intense due to the entry of the Indian and foreign banks into the retail lending business in a big way, thereby exerting pressure on margins. As compared to banks, NBFCs have the ability to take quicker decisions and customize their services in accordance with the needs of the customer. Thus, NBFCs can sustain in this competitive environment only through optimization of funding costs, identification of potential areas, widening geographical reach, and use of technology, cost efficiencies, strict credit monitoring and raising the level of customer service.

## **Our Employees**

The Company lays great emphasis and focus on recruitment and retention of its employees which is the most valuable asset for a service industry like ours. Our internal communication processes and employee engagement initiatives ensure retention and long-term engagement of our talent. We aspire to be an "employer of choice" in the times to come.

## **Competition**

We face competition in all our lines of businesses. Our primary competitors are other NBFCs, public sector banks, private sector banks, co-operative banks, and foreign banks.

In Capital Markets, we face competition from other NBFC's and private sector banks. Their access to lower cost funds enables them to fund certain segments of the market at lower rates.

In Corporate Finance, the large public and private sector banks have traditionally been the market leaders. Their extensive branch network, greater local currency funding capabilities and wider range of products and services enable them to be more competitive and to capture the large as well as emerging corporate segment and expand their business.

In the Project and Structured Finance, our main competition stems from banks that have the capacity to finance Greenfield projects and have access to foreign currency loans. Our competition also stems from infrastructure NBFCs who have access to foreign currency loans.

In Mortgage Finance, our main competition stems from HFCs who have the capacity to finance long-term and have access to NHB finance. Our competition also stems from NBFCs and banks.

People being the prime asset of any service-oriented businesses, our ability to strengthen our existing businesses and establish new businesses largely depends on our ability to attract qualified and highly skilled workforce and motivate and retain the existing ones. Competition is also witnessed in the recruitment and retention of skilled and professional human resources.

The broad objectives of the credit policy is to ensure efficient delivery of credit with focus on asset growth and quality along with continuous growth of loan assets which remains performing and standard at all times. The credit policy interalia provides indicative guidelines specifying the measures to be taken for improving the credit delivery and customer satisfaction and to strengthen the risk management systems for appropriate pricing of credit risks and ensure close monitoring of the credit portfolio. The credit policy of our Company as also prescribes measures to prevent fresh slippages into NPAs along with various functionalities to innovate and evolve competitive products based on market requirements and also to suit our Company’s risk appetite. While our Company has been making efforts towards the risk management practices on an on-going basis, the credit policy emphasizes on initiating a paradigm transition towards a completely integrated risk management system.

The Credit Risk Management of our Company focuses on identification, measuring monitoring and managing the assumed risks which interalia includes a documented loan policy /product program(s), robust approval mechanism, effective loan administration in order to ensure overdue management and bad asset detection and remediation, loan review mechanism and portfolio management tool to manage portfolio level risks. Our Company also relies upon formal and conventional risk assessment viz the capacity and willingness of borrowers to repay and dependence primarily on cash flows for repayment with security taken to provide a secondary source of repayment, depending on respective product programs.

The management of credit risk is undertaken at three levels, namely –

1. Strategic or portfolio level, so as to ensure that no single event can have any significant adverse impact. Portfolio performance by way of collections and delinquencies are continuously monitored
2. monitored through regular portfolio MIS analysis.
3. Established and market-benchmarked credit policy, wherein modifications/refinements to individual programmes are made whenever considered necessary or appropriate.
4. Reliance on the competency of staff to identify and make sound credit decisions.

The Risk Management Group (RMG) of our Company ensures that the loan portfolio in our Company is strictly in line with this credit policy and is always in compliance with all internal policies and regulatory guidelines with on-going improvement of the credit processes. It also tracks relevant sectors/industry and assess key industry risks on an on-going basis along with carrying detailed credit analysis and providing independent opinion to sanctioning committees which ensure that all risks are clearly identified and steps to mitigate are set out and adhered to. Our Company also does portfolio monitoring and portfolio “stress-testing” including proactively reviewing the portfolio based on market conditions and take corrective actions when such portfolio triggers are breached. The RMG also builds a robust ongoing credit coverage discipline on individual borrowers or a group of borrowers, as applicable to each business segment. Further, the RMG also facilitates setting up a Company-wide de-dupe repository and comprehensive defaulters’ list and the same is updated at regular intervals.

Any new product or variant of an existing product or review of any existing product is presented to the product approval committee in the form of a product program note, which is as per the format stipulated from time to time. The product program interalia covers the following areas/subjects – product objective, product/program limit, target category of customers, target market which covers business models prevalent in the target market/customers, specific characteristics of the target market/target customers, specific characteristics of the target markets/customers which have a bearing on risk assessment, defined geographies, borrower profiles, etc. and product features along with methodology for assessment of limits/loan amounts with approval matrix and deviation approval matrix with security and monitoring/MIS/overdues/reporting of irregularities with portfolio controls and diversification/delinquency rates and portfolio triggers and risk containment measures.

The credit assessment/appraisal process and guidelines are kept in view before a credit facility is approved/renewed and all the credit proposals are rigorously appraised. The credit appraisal process interalia involves an in-depth study of the industry, financial, commercial, technical and managerial aspects of the borrower as warranted by the product program.

The Risk Management Group of our Company independently carries out an in-depth credit analysis and market checks of the company/obligor/counterparties/guarantor/promoter/group companies/related parties and provides independent opinion on all the aspects as warranted by the product program. Appropriate credit filters are also designed to weed out cases with weak credit profile and filters are never a proxy to in-depth credit analysis and market reference checks. Each credit proposals are prepared in an appropriate format and placed before the appropriate sanctioning authority. Credit appraisal format are as per the format in respective product program along with guidance notes. De-dupe is carried out as a best practice to check if the Borrower is already having a relationship with the Company. Our Company also obtains information from multiple lenders/bankers so as to stay updated on Borrower's credit health and account conduct with various lenders. Our Company also obtains independent opinion from various sources, including, from the existing bankers/lenders in respect of all new borrowers/parties to the loan on a "best-effort" basis, which are recorded along with reference checks. Our Company uses prudent assessment criteria, such that our Company avoids taking up/financing a majority part of borrowers' credit needs. Suitable methodologies are developed and used by our Company-RMG to assess the risks in structured transactions, including vetting the transactions structure by legal group of our Company. The Risk Management Group also articulates the key risks in any structured transactions including operational/transactional risks, legal risks, compliance risks, market risks, reputation risks, etc. and suggest suitable mitigants for the same. As a prudent lending practice, all current relevant information about any borrower are glanced from the files and over-reliance on information stored in the minds of the dealing officer or his private files are avoided. A robust internal credit rating framework is vital for effective credit risk management.

Our Company follows the standard credit practices of analysing and monitoring credit limits and exposures to NBFC's. The below key areas are analysed for all NBFC's, besides the specific areas which are laid down in detail in the respective product programs and/or guidance notes-

- Earnings stability and business model sustainability
- Asset Quality
- Capital Adequacy and leverage
- Management quality and operational capabilities
- ALM, Liquidity and treasury management
- Systematic and regulatory areas
- Type of collateral /security and enforceability
- Reporting, control and risk management systems

As per our Company's Loan monitoring system, further disbursements/discounting/debit transaction is auto-prevented by the system once the limit expiry date is reached. Thus, further drawl is not be permitted by the system as there is no "auto-renewal" of credit facilities/limits, which have expired/lapsed. Renewal can be done one or more times in a year when the credit facility/limit expires or borrowers applies for new limit with enhancements or borrowers applies for revalidations of lapsed/expired credit facility/limit. Renewals can be with or without enhancement – it can also be with 'reduction' in credit limit, renewal of stressed cases are dealt with based on merits of the individual credit proposals. Renewals depend on the credit quality of the borrower at the time of renewal and the renewal is subject to the discretion of the sanctioning committee. Further, the facility type and amount sanctioned, terms and conditions stipulated, pricing/interest rate etc. approved at the time of renewal may be different from what the borrower enjoyed in the previous year/cycle. The Company also maintains the MIS of all credit approvals and their corresponding expiry dates, which are used to take necessary actions.

Express renewal policy is also applicable for accounts/borrowers satisfying certain criteria at the time of application for express renewal, wherein amount has to be 'regular' (based on repayment method), asset quality classification is 'Standard', internal credit rating/grading score is within 'Investment grade' as per our Company's internal credit rating model or valid external rating. In case of unrated accounts, approving authority decides on express renewal.
